

## Technical Specifications for the Nail Drilling Machine - Mini

### Mini technical specifications

Operating voltage:	110 - 230 AC voltage / 50 - 60 hertz
Protection class:	1 / IPX0
Power consumption:	Max. 30 VA / in stand-by mode max. 10 VA
Micro motor speed range:	Continuous 2,500 to 42,000 rpm  <b>Our micromotor is brushlessly commutated, has a higher power, generates less heat and is almost without wear!</b>
Speed display accuracy:	In speed range from 5,000 rpm to 42,000 rpm better than +/- 4%, below that better than +/- 10%
Dimensions:	135 x 110 x 150 mm (width x height x depth)
Weight:	900 g including motor hand piece
Operating temperature:	10°C - 35°C After transport or storage below the specified operating temperature, the device should be acclimatised to room temperature for approx. 30 minutes due to possible condensation
Transport and storage temperature:	-10°C to +60°C

Bahner Feinwerktechnik GmbH reserves the right to make technical and optical changes to its products at any time and without prior notice.

No electromagnetic interactions are known to occur between this device and other devices.
